

## Delivering the Difference

What you need.  
When you need it.  
By people that know and care.

# The Difference

JULY 2010 - CALGARY

### Canadian Building Permits in April are 13.9% higher than April 2009

### Canadian Lumber Production Posts Double-Digit Increases

Canadian lumber production in April reached 2.0 billion board feet, up 29% from the same month in 2009.

**Landmark formaldehyde legislation is expected to be signed by President Obama in July.** The bill will establish the first comprehensive national standard for formaldehyde emissions from composite wood products, and directs the US Environmental Protection Agency to promulgate implementing regulations by January 1, 2013. The standard will be based on California's "CARB" rule rather than on something potentially different and more costly. The US bill will have immediate impact on Canadian producers and fabricators of composite panels and plywood.

Take steps to prepare for the return of a more vibrant wood industry and attend the **International Woodworking Fair** in Atlanta, August 25 to 28
